# Focus Listen Innovate

Accsoon delivers powerful and high-quality products to professionals and enthusiasts worldwide in the film industry by combining outstanding design and innovative user-centric technology.

## FOCUS

Since 2014, Accsoon has been dedicated to developing high-quality and high-performance products for professional-level wireless broadcasting, film, and general video creation, focusing on wireless video transmission and other video equipments.

## LISTEN

Accsoon's products are loved by practitioners and enthusiasts in the film industry worldwide. We listen to users' opinions, polish each product, and devote ourselves to assisting users to create splendid videos.

## INNOVATE

Accsoon's innovative technology and outstanding product performance have helped it gain a foothold in the film industry. Accsoon has released several revolutionary products that have been recognized by users in more than 50 countries and regions since 2014.

# DEVELOPMENT HISTORY

**2014** ● **The Founding**  
Accsoon officially launched the stabilizer solution for cine-cameras and stabilizer solutions for mobile phones and GoPro.

**2018** ● **International Recognition**  
Accsoon launched the world's first stabilizer with an integrated video transmission system at the IBC in Netherlands.

**2019** ● **Meet CineEye**  
Accsoon's R&D focus shifted towards wireless video transmission systems. The release of "CineEye" video transmission led to the change of wireless monitoring and started a new wave of mobile device monitoring.

**2020** ● **Introducing Dual-Band**  
Being the world's first, Accsoon integrates 2.4GHz and 5GHz Dual-Band technology into its wireless video transmission system, solving the problem of unstable transmission caused by interference.

**2021** ● **Widely Praised**  
Accsoon has invested a lot of time and effort in wireless video transmission technology and has released a series of professional, powerful, and cost-effective products that have been approved by film industry.  
"The Accsoon has the best latency of any of the sub \$1,000 USD compressed video transmission systems I have reviewed." — Matthew Allard, Newsshooter.com

**2022** ● **Huge Leap**  
A trusted name in the production world, Accsoon has stepped up its game with this new release of Accsoon SeeMo, the world's 1st professional HDMI adapter and video capture terminal for iOS that connects via Lightning or USB-C.

**2023** ● **Integration Ecosystem**  
This year has seen announcements of new iOS app integrations with key industry players including Frame.io, Switcher Studio, TVU Networks. The versatility of these and other upcoming integrations demonstrates just how SeeMo changes the game.

**2024** ● **New Era**  
With a commitment to pushing the boundaries of technology, Accsoon continues to innovate and bring advanced technology to a wider audience at an affordable price. From video sliders, wireless communication systems to 4K videos, your creative experience just got taken to a new level.

# Resistant to Interference Stable than Ever

## US PATENT GRANTED

Utilize both 2.4GHz and 5GHz frequencies, transmitting two images that combine at the receiver for an interference-free and low-latency image.

No black screen, no drop-outs.

Dual-Band is developed in-house by Accsoon to bring significantly improved stability and glitch-free wireless connection between the transmitter and the receiver, giving the user increased confidence during a shoot.

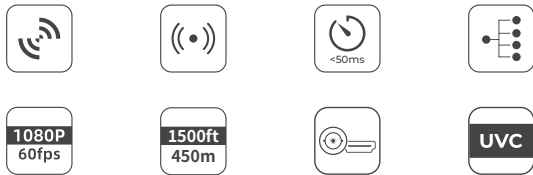

# CineView 2 SDI NEW

Stability with a longer range  
Long Range SDI and HDMI Dual-Band Wireless Video Transmission System

- 2.4GHz+5GHz Dual-Band Transmission
- Latency Less Than 50ms
- SDI In&Out
- HDMI In, Out & Lossless Loop Out
- Stronger Signal That Can Transmit Up to 1500ft / 450m
- UVC Output For Live Streaming
- Monitoring on Up to 4 Devices
- 1080p 60fps
- Smaller and More Compatible Than Ever

# CineView Nano

Light and Compact  
Portable HDMI Wireless Video Transmitter

- 72.3g
- Latency Less Than 0.06s
- 1 Transmitter for 4 Mobile Devices
- Transmit Up to 500ft/150m
- Removable Phone Clamp
- Gimbal Mount Adapter

# CineView SE

Faster. Stronger. Cooler.

SDI and HDMI Dual-Band Wireless Video Transmission System

- 2.4GHz+5GHz Dual-Band Transmission
- Monitoring on Up to 4 Devices
- Latency Less Than 50ms
- Powered by DC, NP-F Battery and USB-C
- SDI+HDMI In&Out
- Transmit Up to 1200ft/350m
- Compatibility with Android Phones and iOS Ecosystem

2.4GHz+5GHz  
DUAL-BAND

2.4GHz+5GHz  
DUAL-BAND

# CineView HE

Easy Live Streaming

HDMI Dual-Band Wireless Video Transmission

- 2.4GHz+5GHz Dual-Band Transmission
- UVC Output For Live Streaming
- Latency Less Than 60ms
- HDMI In, Out & Lossless Loop Out
- Monitoring on Up to 4 Devices
- Transmit Up to 1200ft/350m
- Compatibility with Android Phones and iOS Ecosystem

# CineView Quad

Easy Set Up  
SDI and HDMI Dual-Band Wireless Video Transmission System

- 2.4GHz+5GHz Dual-Band Transmission
- Built-In Foldable Antennas
- Latency Less Than 60ms
- Compability with Android Phones and iOS Ecosystem
- SDI+HDMI In&Out
- Transmit Up to 500ft/150m
- Monitoring on Up to 4 Devices

- PD 30W quick charge for iPhone/iPad
- Different output options for multi-device
- Recharge NP-F batteries
- Battery level indicator
- Circuit protection

# Accsoon APP

## Accsoon SEE

High accuracy, low latency professional monitoring

Use with: Accsoon SeeMo and CineView series.

With the Accsoon SEE app, it transforms your mobile device into a fully featured production monitor with a complete set of professional tools such as waveform, magnification, vectorscope, false color, peaking and audio level meters. Users

can apply custom LUTs, or use the onion skin image overlay to precisely line up their shots. There are even options to de-squeeze anamorphic video on-screen, or flip video to aid self shooting.

Support RTMP Live Streaming

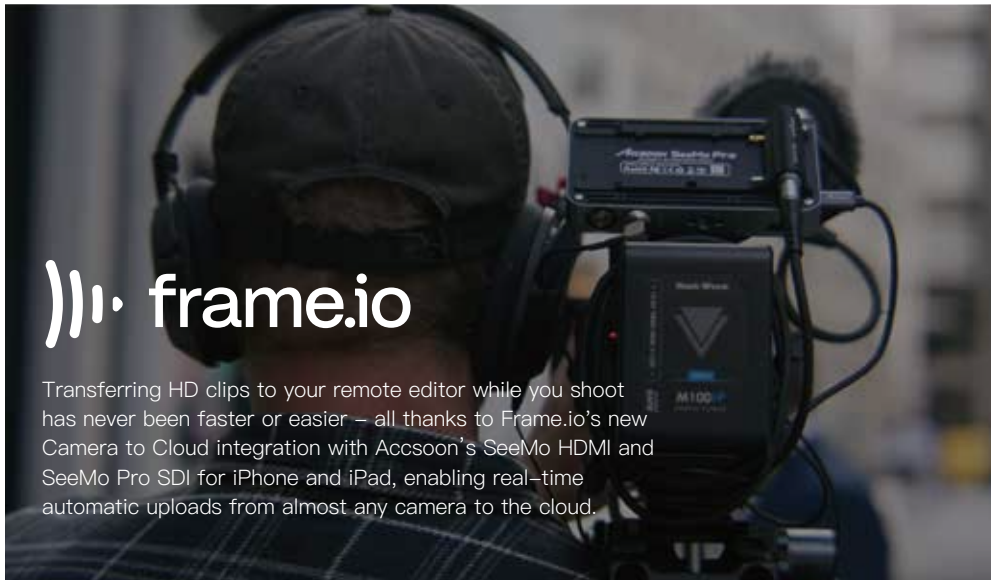

Easy Recording and Sharing

Professional Monitoring Features

Continuous updates available to fulfill your needs

# BE AT THE CENTER OF AN iOS ECOSYSTEM

By bringing SDI and HDMI video into iOS, SeeMo truly is at the center of a new set of powerful creative tools.

**frame.io**

Transferring HD clips to your remote editor while you shoot has never been faster or easier – all thanks to Frame.io's new Camera to Cloud integration with Accsoon's SeeMo HDMI and SeeMo Pro SDI for iPhone and iPad, enabling real-time automatic uploads from almost any camera to the cloud.

**Switcher Studio®**  
Create. Share. Monetize.

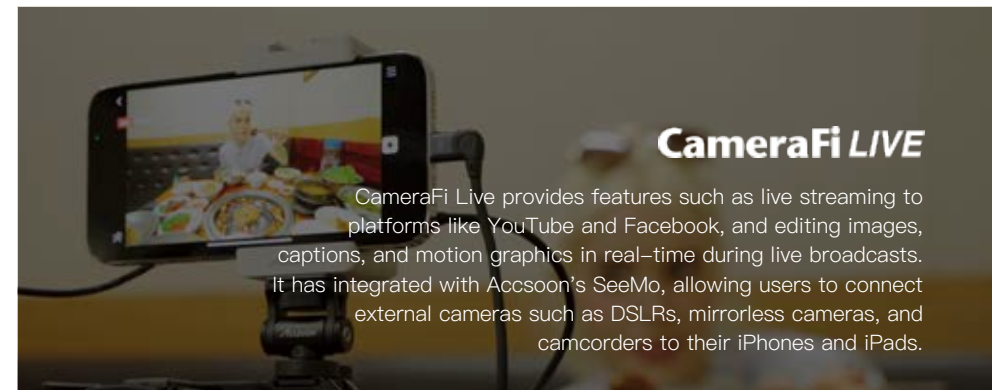

Creating a touch-controlled multi cam live stream is now as simple as attaching a SeeMo device to each SDI or HDMI camera and starting Switcher Studio on your iOS device.

# ACCsoon

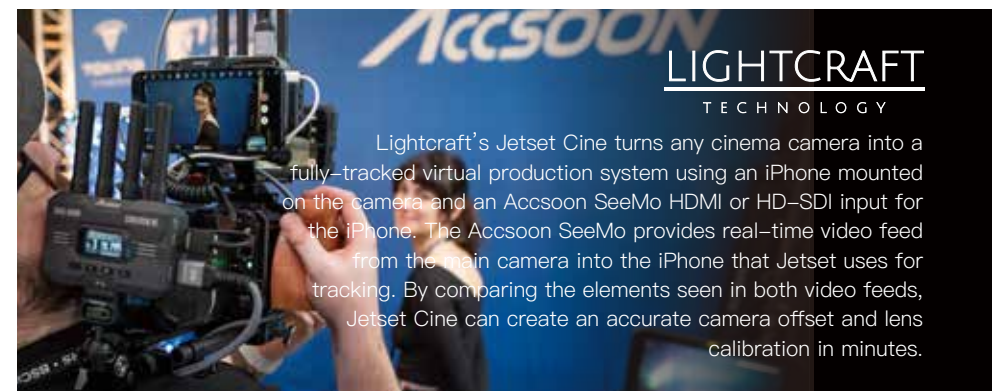

**TVU Networks**

TVU Anywhere is used by broadcasters and live streamers worldwide to transmit live full HD video from mobile devices. The app aggregates your mobile device's 3G/4G/LTE/5G cellular connection with available Wi-Fi for more robust transmissions. Now users can connect their professional cameras to the TVU Anywhere app via SeeMo and seamlessly go live.

**CameraFi LIVE**

CameraFi Live provides features such as live streaming to platforms like YouTube and Facebook, and editing images, captions, and motion graphics in real-time during live broadcasts. It has integrated with Accsoon's SeeMo, allowing users to connect external cameras such as DSLRs, mirrorless cameras, and camcorders to their iPhones and iPads.

**ACCsoon**

**LIGHTCRAFT**  
TECHNOLOGY

Lightcraft's Jetset Cine turns any cinema camera into a fully-tracked virtual production system using an iPhone mounted on the camera and an Accsoon SeeMo HDMI or HD-SDI input for the iPhone. The Accsoon SeeMo provides real-time video feed from the main camera into the iPhone that Jetset uses for tracking. By comparing the elements seen in both video feeds, Jetset Cine can create an accurate camera offset and lens calibration in minutes.
